

Assignment 7

Manav Garg

31 December 2020

1 Boolean Expression

The Boolean expression of $f = A\overline{B}\overline{C}\overline{D} + \overline{A}B\overline{C}\overline{D} + A\overline{B}C\overline{D} + A\overline{B}C\overline{D}$

2 Kmap Expression

$$f = A\overline{B}\overline{D} + B\overline{C}\overline{D} + A\overline{C}\overline{D}$$

Now, we have to make this expression in product form So, we will use the property $\overline{\overline{X}} = X$

$$f = A\overline{B}\overline{D} + B\overline{C}\overline{D} + A\overline{C}\overline{D}$$

$$\overline{\overline{f}} = \overline{\overline{A\overline{B}\overline{D} + B\overline{C}\overline{D} + A\overline{C}\overline{D}}}$$

$$\overline{\overline{f}} = \overline{(\overline{A\overline{B}\overline{D}})(\overline{B\overline{C}\overline{D}})(\overline{A\overline{C}\overline{D}})} \dots \text{by Using } (\overline{X+Y+Z} = \overline{X.Y.Z})$$

2.1 COMBINATIONAL CIRCUIT
